Join Energy Tech Summit Asia 2026!

Energy Tech Summit Asia is the APAC edition of **Europe's #1 climate tech conference**, bringing together startups, investors, corporates, utilities, policymakers, and industry leaders on **September 29–30, 2026 in Kuala Lumpur, Malaysia**.

As one of the summit's flagship programs, **Energy Tech Challengers Asia** is inviting the region's most promising climate and energy tech startups to pitch their solutions in front of leading VCs, corporate investors, and strategic partners.

This year's competition also includes a dedicated **Startup Call** from **ABB**, giving selected startups the opportunity to showcase their technologies directly to global industry leaders tackling real-world energy challenges.

Applications close on **August 10, 2026**.

---

Hi there,

I'm excited to invite you to **Energy Tech Summit Asia**, taking place on **September 29–30, 2026 in Kuala Lumpur, Malaysia**.

As the APAC edition of Europe's #1 climate tech conference, Energy Tech Summit Asia brings together startups, investors, corporates, utilities, policymakers, and industry experts for two days of meaningful conversations, practical insights, and new connections.

From clean energy infrastructure and industrial decarbonization to AI, climate software, investment, and policy, the summit is designed to connect the people building and deploying the technologies behind the energy transition.

One of the summit's key highlights is **Energy Tech Challengers Asia** – flagship startup pitch competition. Selected startups will have the opportunity to pitch live in front of leading VCs, corporate investors, and strategic partners, while connecting with potential customers, partners, and investors from across the ecosystem.

This year's edition also features a dedicated **Startup Call** from **ABB**, offering selected startups the opportunity to present their solutions directly to industry leaders and explore potential collaboration opportunities.

Applications close on **August 10, 2026**.

If this sounds relevant to your team, you can learn more about the competition here:
